Product Designer Business Messaging

- Own design and strategy for ads that click to message, focused on the end-to-end experience for businesses that use Messenger, IG Direct, WhatsApp, or Meta Business Suite as a sales channel.
- Responsible for driving \$53M in increased revenue in 2023 and mitigating revenue gaps by 11% for WhatsApp ads and 12% for Messenger ads due to FB business page changes.
- Led strategic V team creating Northstar vision for conversational automations for businesses using Generative AI and AI business agents in Meta Ads Manager.
- Launched first milestone GenAI feature for Messaging Ads with a 95% adoption rate and surpassing our revenue goal by 200%.

Autodesk • 03/2015 - 07/2021

Sr. User Experience Designer Design Strategy Team

- Won data hackathon and lead team in building an aggregated qualitative data hub aligned with Autodesk's new data-driven vision. Cut costs and opened data access to over 10,000 employees.
- Designed multi-lingual cross-property mobile navigation for Autodesk's main web properties deployed across 41 country sites. Redesigned primary navigation, mega-footer, legal footer, and notifications in phased roll out across digital ecosystem.
- Hired, mentored, and managed summer interns.

Sr. User Experience Designer UX Research Team

- Partnered with CX Analytics to create the company's first data-driven customer journey map with identified top pain points.
- Created partner and customer personas that can be identified and correlated with our data and analytics.

User Experience Designer Service Design Team

- Led initial discovery, research, and prototyping efforts for AVA, Autodesk's Virtual Agent helpbot.
- Redesigned Autodesk Services Marketplace onboarding flow, reducing incorrect location sign-ups by 95%
- Created internal tools for the direct management of customer accounts by resellers.
